

EduGenie Project

Topic 6 — learning_path.py — Learning Recommendations

```
from gemini_client import generate_text

def get_learning_recommendations(topic: str) -> str:
    prompt = f"""
    Create a personalized learning path for the topic below.
    Assume the learner is a beginner.
    Organize it from Beginner -> Intermediate -> Advanced.
    For each stage include:
    - topics to learn
    - suggested practice
    - an approximate timeline
    - useful resource types (videos, official documentation, books, practice sites)
    Do not invent specific URLs. Keep the plan practical and concise.

    Topic:
    {topic}
    """
    return generate_text(prompt)
```
